OnDemand5.com Video Training These Flash videos are designed to provide step-by-step instruction on using the most important program features. For best results in viewing the videos, we recommend a high-speed Internet connection and that you set your display resolution to 1024 x 768, or higher.

- Repair Overview** - Learn about product navigation such as selecting a vehicle and review article tools and options available for viewing and printing. Step-by-step repair procedures including graphics, wiring diagrams and specs.
- Using Search** - The Search function complements the category approach by allowing users to find data using keywords. It also uses "smart search" to ensure accurate results regardless of terminology.
- Estimator / Quote Screens** - Build estimates with the industry standard labor database from 1974-2006 and OEM parts. Quote screen provides a simple work area for those not currently using our full shop management programs.
- TSBs / Recalls** - Provides access to vehicle mfg. Technical Service Bulletins, allowing shops to quickly pinpoint causes for unusual vehicle complaints. Factory Recalls campaign information is also included and updated monthly.
- Maintenance / Fluids** - Handy access to detailed Scheduled Services with labor times included (1990-up) in Normal, Severe and now Indicator Services on newer vehicles. Fluid specifications and capacities are also listed here.
